Social workers managing multiple conversations & contexts.

The average caseload in the social service sector: **18 to 21 cases per worker.** According to MSF in an Article by The Straits time (Nov 06, 2025).

Youth workers rely on **memory or manual notes** to recall what was discussed **risking errors in personalized support**.

Think of a teacher managing a whole class, they can't be available to everyone 24/7.

After-hours support gaps & broken handoffs for the youths.

The youths need someone to talk to after hours.

No social worker will be available for them during these hours.

Even existing AI chatbots **create a new problem**:
The next day, the youth must repeat their entire situation to the worker, because **no context was captured or transferred**.

These problems causes **the gaps that no one sees.**
That leads us to this question: **What can we do to make sure the voices of the youths can be heard?**

Introducing Regrove. The safe space to grow.

“Regrove” is web portal connecting youths and social workers through daily check-ins, honest conversations, and trusted AI support.

One platform. Two problems solved.

- Every message, check-in, and session is automatically summarized by AI.
- Workers see each youth's full history in seconds, no memory required.
- After hours AI support for youths that is recorded and accessible to social workers.

Regrove. One platform. Two worlds. One shared goal.

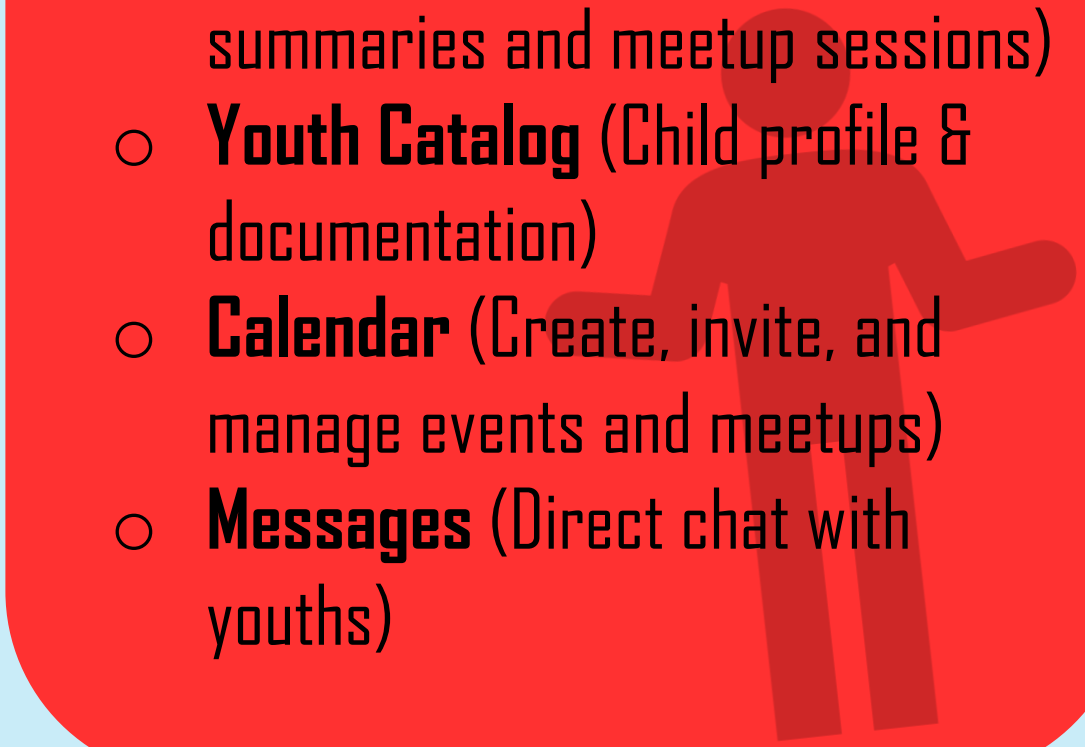

Youth Support:

- **Daily Check-Ins**
- **After Hours AI Companion** (6pm–7am)
- **Messages** (Direct chat with social workers)
- **Calendar** (View meetups and events planned by the social worker)

Social Worker Support:

- **Active Cases Management** (Live digital clipboard with AI summaries and meetup sessions)
- **Youth Catalog** (Child profile & documentation)
- **Calendar** (Create, invite, and manage events and meetups)
- **Messages** (Direct chat with youths)

Daily Check-Ins

AI Companion

Active Cases & Youth Catalog

Calendar & Messages

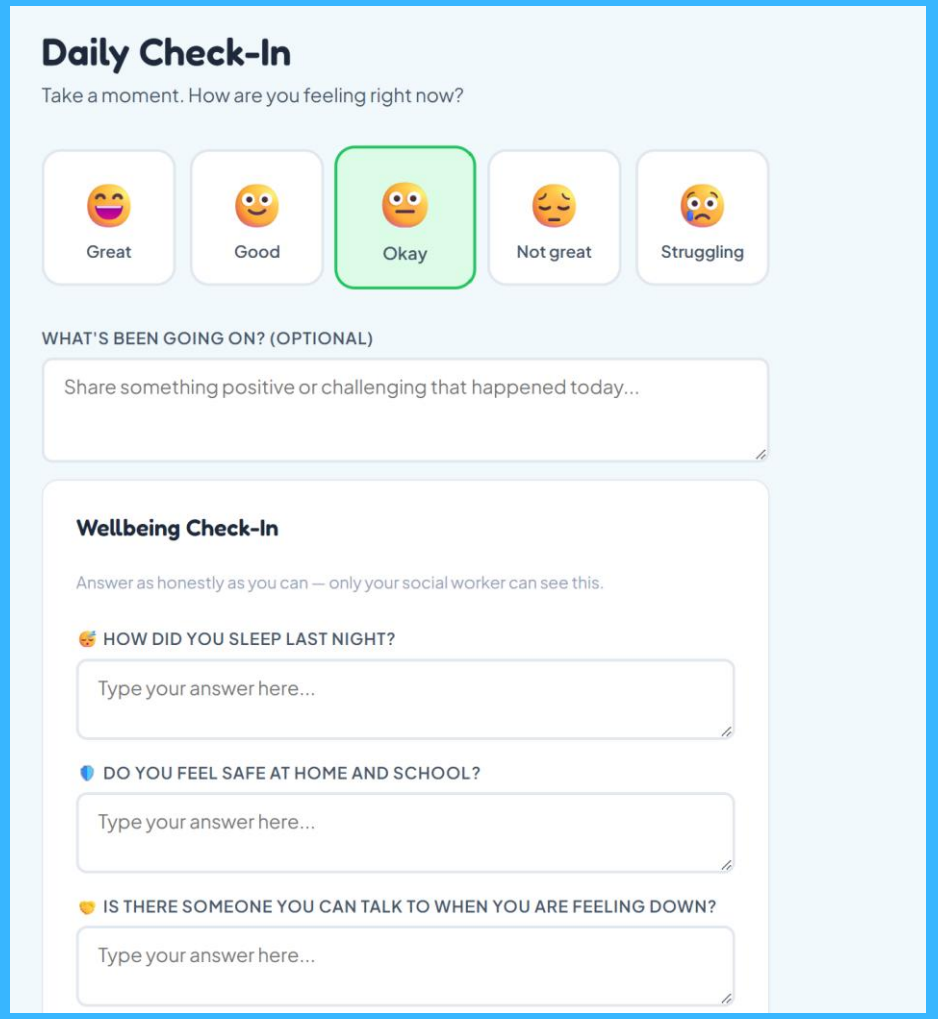

Daily Check-Ins (Youth)

Can't meet the social worker today?

The youth can pick an emoji. That single tap tells the social worker how they're really feeling.

Afterwards, more questionaries will be given to the youth.

Reponses will be accessible to the social workers.

Daily Check-Ins

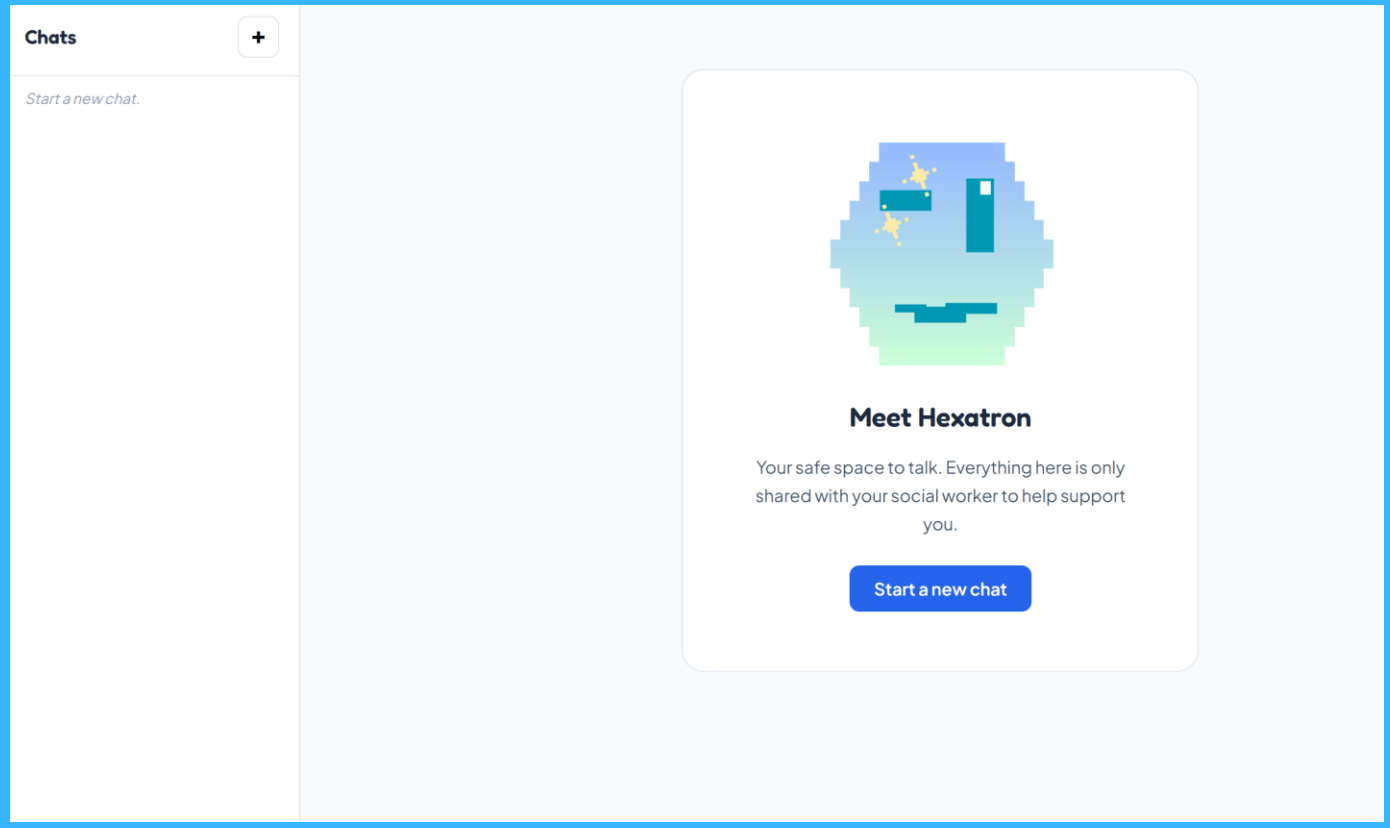

AI Companion

Active Cases & Youth Catalog

Calendar & Messages

AI Companion (Youth)

After hours, youths will be able to access their AI companion, "Hexatron". **Meet Hexatron, it offers the youths a listening ear.** Once the sun shines, Hexatron goes to bed and he tells the social worker about any conversations.

Daily Check-Ins

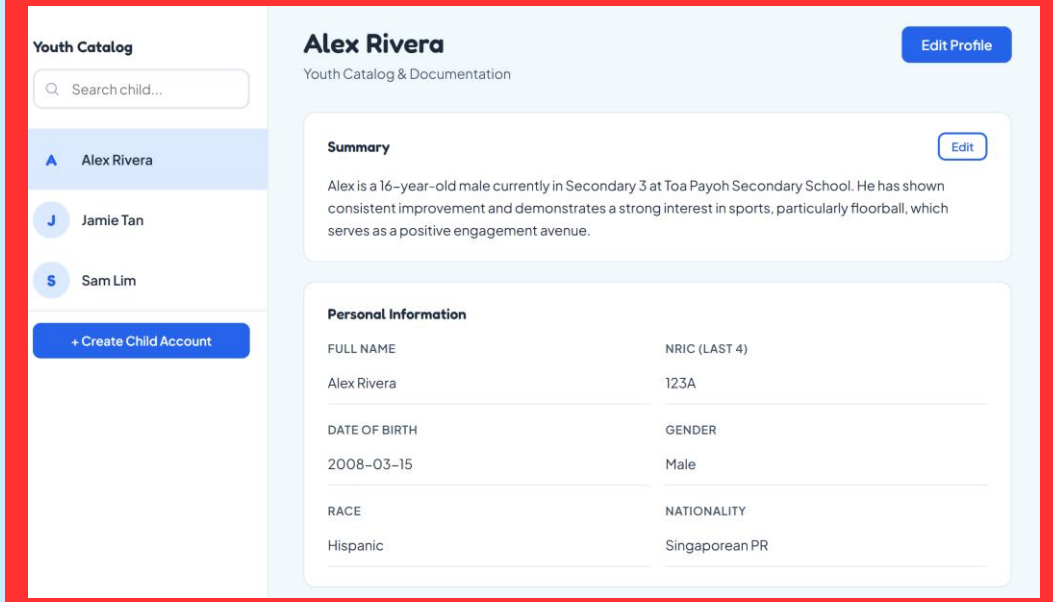

AI Companion

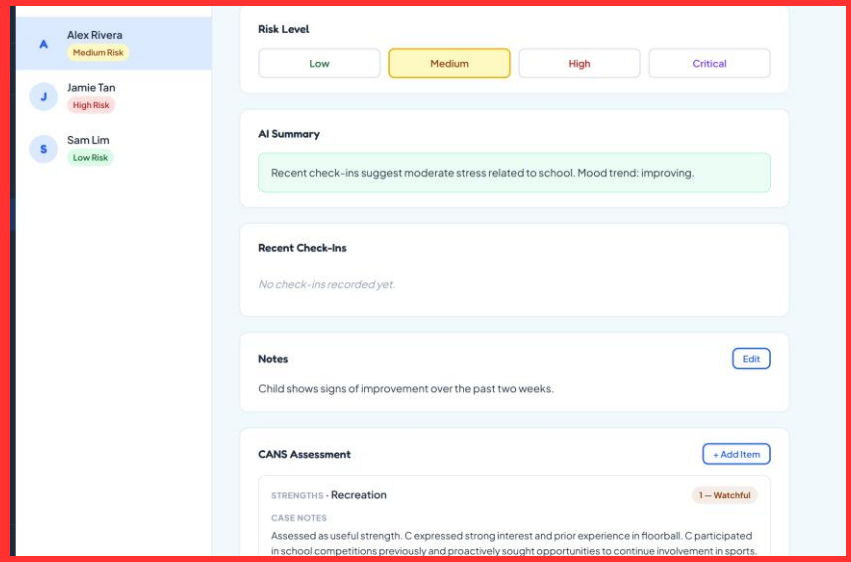

Active Cases & Youth Catalog

Calendar & Messages

Active Cases & Youth Catalog (Social Worker)

Active cases & Youth Catalog, simplifies the burdens of the social workers. **AI summaries will be displayed and CANS assessment can be done on Active cases, a session recording function reduces the documentation that the social worker has to do! Youth Catalog acts a information and documentation page, it allows the social worker to create accounts for the youths too!**

Daily Check-Ins

AI Companion

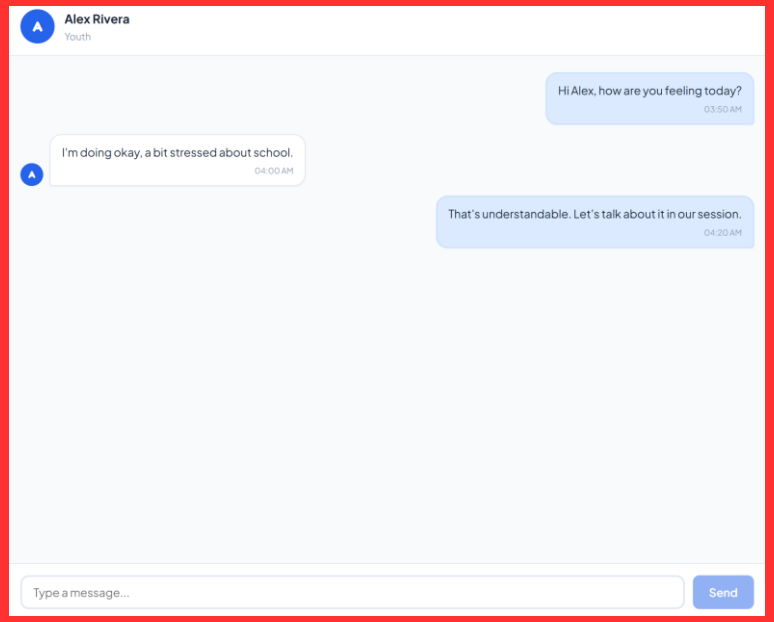

Active Cases & Youth Catalog

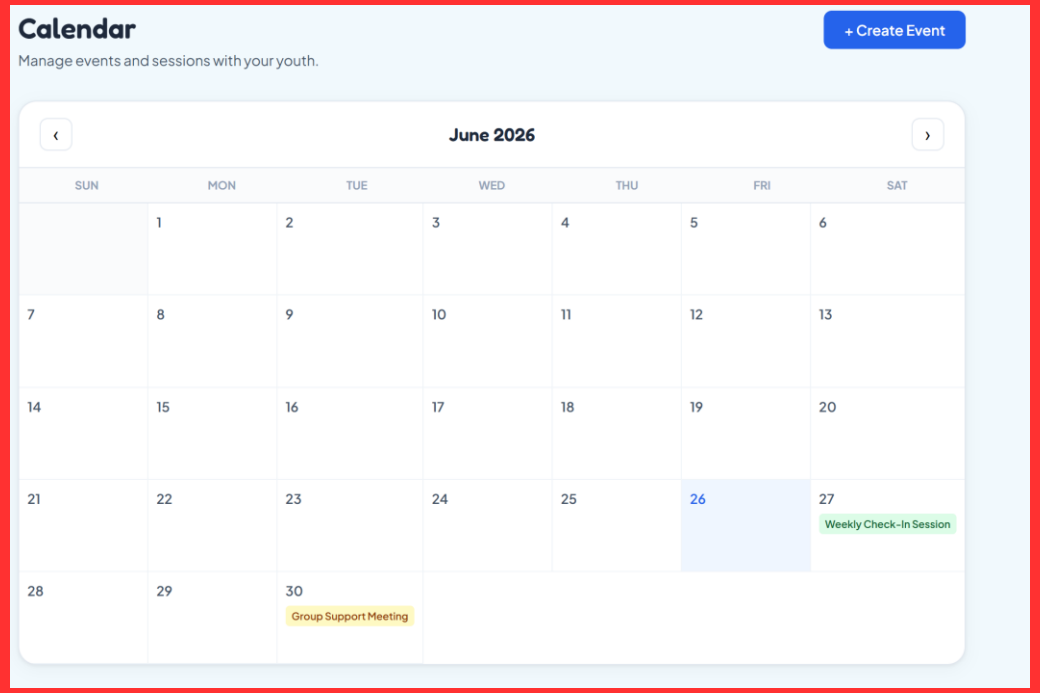

Calendar & Messages

Calendar & Messages (Social Worker)

The calendar allows social workers to **create events that is visible to the youth they are inviting.**

If the youths are not with the social worker physically, the social worker could use the **message function to communicate with the child.**

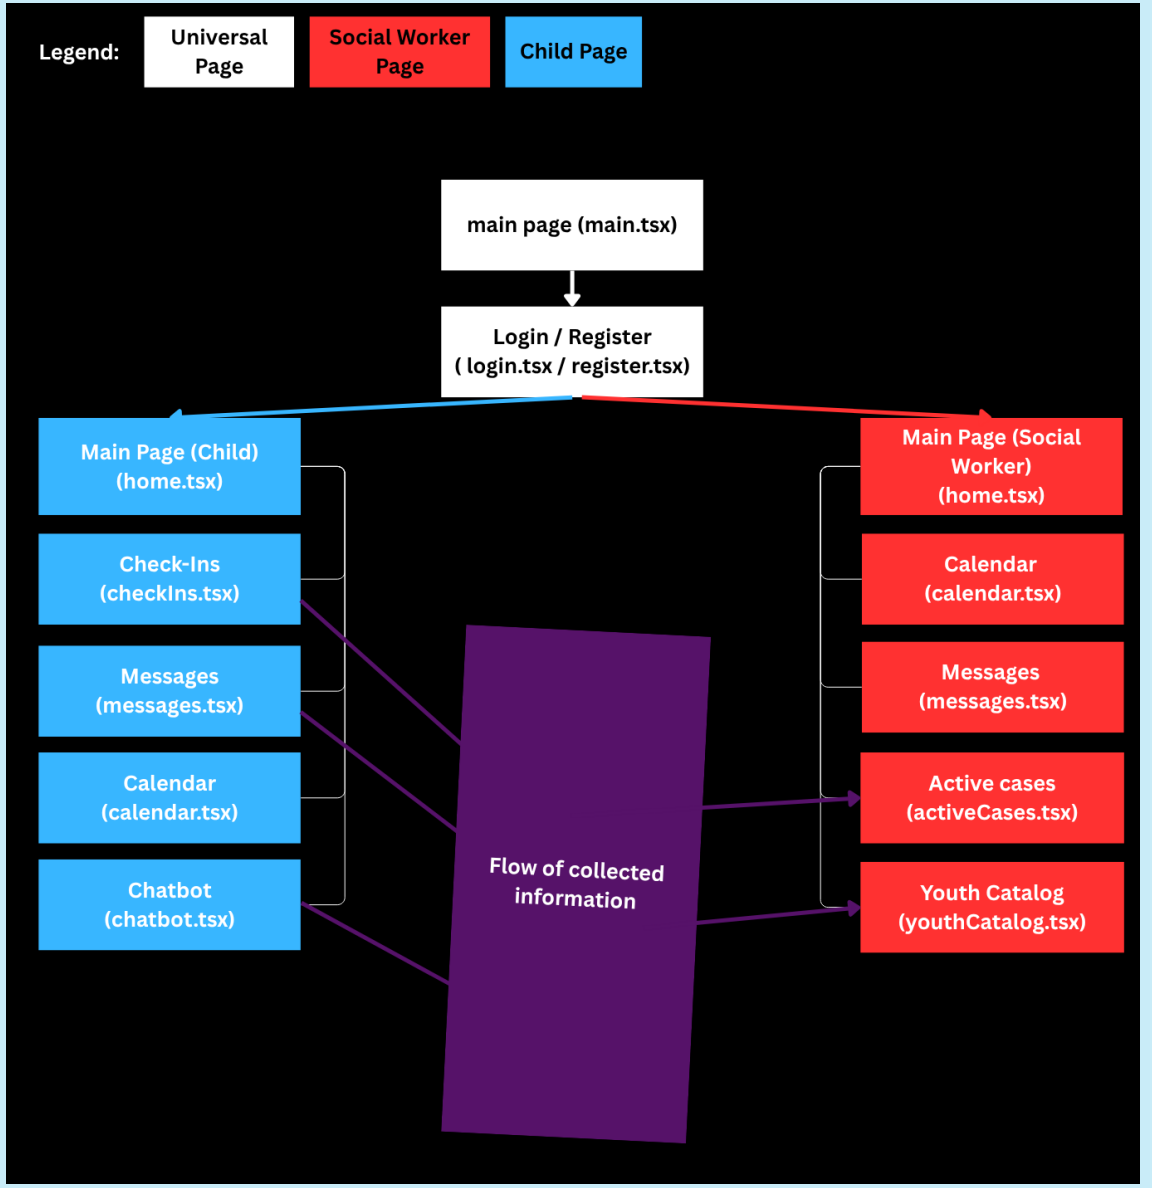

Regrove is accessible. Built for easy use

Works on any browser. No download. No app store.

- Dual-portal (child vs social worker routes)
- Role-based access
- Simple and friendly interface for social workers and youths alike.

***Security note:**
Child accounts cannot be self-registered. Social workers can create them after onboarding in their interface at the **Youth Catalog Section.**

Social workers are heros to the youths.

Regrove gives their heros the power up!

Problems	How Regrove solves it
Managing multiple conversations & context	Active Cases Management with AI summaries. Youth Catalog full profile. CANS assessment records. **Reduced documentation needed.**
After-hours support gaps	AI companion (6pm–7am). Daily Check-Ins that **feeds context directly to the worker.**
Broken handoffs (Youth must repeat their situation the next day)	AI chat summaries auto-delivered to social worker. **Recorded Meetup Session AI notes.**

Thank you.

Help us help them Regrow, Redo & Regrove.

We'd love to hear your thoughts!

Any questions for us?
