Professional Summary

Cloud and Cybersecurity-focused IT student with over 3 years of hands-on experience in IT infrastructure support, project coordination, and team leadership. Proven track record supporting government infrastructure through system monitoring, observability, and operational troubleshooting. Specialized in AWS cloud services, Linux administration, and network security. Available for a 1-year internship commencing March 2027.

Industrial Experience

Sky & F Pte Ltd

Project Team Lead | Seasonal | On-site | Dec 2025 - Present

- Lead project teams in managing client communications and manpower allocation for IT infrastructure projects.
- Coordinate issue resolution between engineers and clients to ensure smooth system deployment and operations.
- Successfully completed 2 government projects (IT asset management) within a month while leading a small team of 5-10 IT Project Engineers.

Senior IT Project Engineer | Part-Time | On-site | Jun 2024 - Present

- Mentored junior engineers and supported their technical and professional development
- Monitored system alerts and provided technical support for clients
- Manage client systems and contribute to infrastructure deployment and maintenance
- Assist in ensuring project deliverables are completed on time and meet service expectations
- Consistently ensuring high availability uptime for major government systems while training and mentoring multiple batches of Junior IT Project Engineers for the company.

Junior IT Project Engineer | Internship | On-site | Oct 2023 - May 2024

- Monitored system alerts, provided technical support to ensure system stability for clients
- Performed hardware troubleshooting including UPS (Uninterruptable Power Supply) replacement and system maintenance
- Successfully mitigated serious system alerts from government infrastructures that would lead to massive downtimes. Awarded with a Letter of Commendation.

Education

Singapore Polytechnic | Apr 2025 – Apr 2028 | Cumulative GPA: 3.47

Diploma in Computer Science, majoring in Cloud Computing & Cybersecurity (Previously known as Diploma in Information Technology)

Institute of Technical Education (ITE) | Jan 2022 – Dec 2024 | Cumulative GPA: 3.69

Higher NITEC in Cyber & Network Security (Certificate of Merit)

Industrial Certifications and Badges

- EC-Council, Certified Security Specialist
- EC-Council, Certified Secure Computer User
- arcX, Foundation Level Threat Intelligence Analyst
- Amazon Web Services (AWS), Cloud Foundations (Trained)

Technical Skills

Cybersecurity: Network Security, Incident Response, Penetration Testing, Threat Intelligence, OSINT (Open Source Intelligence), Digital Forensics
Cloud Technologies: AWS (EC2, RDS, ALB, ASG, VPC, S3, IAM)
Operating Systems: Linux (Kali, Debian, Ubuntu, Red Hat, Mint), Windows (10, 11, server 2016, 2019)
Programming: JavaScript, Python, SQL, PostgreSQL
Networking: TCP/IP, Troubleshooting, Infrastructure Support, Cisco Technologies
AI: NLP & LLM basics, Open-Source AI Models (DeepSeek, Claude, ChatGPT, Perplexity)
General Tools: Microsoft Office Tools, Canva, PowerPoint (for reporting & presentations)

Projects

Digital Forensics - Security Operations Center Incident Investigation (Independent Project):

- Acted as a level 1 Cybersecurity analyst of a Security Operations Center practicing Digital Forensics
- Correlated 9 SIEM alerts in Kibana, identified 5 attacker IP addresses (US & France), and traced C2 communication patterns.
- Analyzed malicious scripts and outdated Flash version using Wireshark and VirusTotal to classify malware families.
- Documented containment steps (system isolation, cache clearing, backup restoration) and prevention strategies (patch management, anti-ransomware tools, disabling Flash).

Highly Available AWS Cloud Infrastructure for Web Application (Independent Project):

- Designed and deployed a fault-tolerant AWS architecture with a custom VPC spanning two Availability Zones, public/private subnets, route tables, S3 storage ,and IAM roles
- Launched EC2 instances with user data script for automated web page deployment and configured Application Load Balancer to distribute traffic.
- Implemented Auto Scaling Group with launch template and CloudWatch detailed monitoring to enable dynamic scaling and operational visibility.

Related Activities, Competitions and Achievements

- Participated in CTFs: Gryphons CTF (OSINT, Web, Forensics), GreyCTF
- Actively contributing as a subcommittee member of a cybersecurity student interest club named “Gryphons”
- Competed in Hackathons: PolyFinTech100 Hackathon 2025 by NETS
- Currently competing in the DELL SP InnovateDash 2026 by DELL
- Top 5% of the Cyber & Network Security Higher NITEC graduate cohort (Awarded with a Certificate of Merit)
